

The Daily Gazetteer.

WEDNESDAY, JUNE 13, 1744.

Lisbon, May 13.

15 Majesty is return'd from the Hot Bath much better than he was; and we now flatter ourselves, that he will get over his Distemper entirely. It is impossible to describe the Joy that this has occasion'd among all Sorts of People in this City, where his Majesty has been always behov'd as a common Pa-

To temper this Transport of Affection, a very Accident has happen'd in the Royal Family; Princess of Brazil, who was with Child for the fifth Month of her Pregnancy; and standing at the Windows of the Palace, she saw a poor Litter fall from a Scaffold against the Cathedral Church, Pright of which occasion'd this unhappy Accident, gives us so much Concern.

May 29. Prince Lobkowitz has actually pass'd Ther near Monte Rotondo, with all his Forces, and possest'd himself of the strong Camp at Frejat, where he waits for 10,000 Men that are to join him, which are collected out of all the Garrisons in Italy; which are now supplied by the Militia and Burghers. Majesty, the King of the Two Sicilies, is, on the Hand, advanced towards him as far as Valetti, where he is likewise encamp'd; so that the Armies are now a Day's March asunder. How long they will be in this Situation, is uncertain; but we take it granted, that if the Spaniards and Neapolitans do right immediately, their Troops will soon divide them.

June 1. According to all our Advices from North, there is something of the last Importance agitation at Moscow; which the Court of France is labouring to promote, or disappoint, by Dint of every Post, and every Express, bringing Fresh for the Marquis de la Chetardie; who, it is report'd, has hitherto call'd for very little of the Money.

June 3. We look upon it as a Thing certain, that the Differences between this Court and that of Russia are absolutely settled; and it is said, this is owing to the of the Marquis de Botta, which having obliged Count to come to some necessary Eclairecissements, the Conduct of France, such Discoveries were thereby, as convinc'd the Czarina, and her Hun-

Majesty, that they had, in reality, but one com-

mony. In short, Count Esterhazy is arrived here

Dresden, in order to receive the necessary In-

for his Negotiation at Moscow, for which

he will set out the latter End of this Month, or

beginning of next. It is look'd upon as a Thing

to be in doubt, whether Prince Charles will go this Year

command in the Netherlands; and the most sag-

er of our Politicians incline to think he will not.

Advices from the Duke of Aremberg have occi-

ded several Councils of War to be held; and a Ru-

rum has been largely spread, that another Field Marshal

be sent into the Low Countries; but People do not

give any great Credit to it. It is certain, that

Majesty has appointed Prince Wenceslaus de Lich-

ton, General of Artillery, in the room of the Field

Count Conigseg, to whom her Majesty has been

advised to give the Government of this City. The three

Regiments are not as yet disposed of, but it is

upon as a Thing certain, that Count Ostein, Bro-

ther to the Elector of Mentz, will have that which be-

longs to the late General Lanthieri.

June 15. According to our last Advices from

Lisbon, the Deliberations of the States General are

extremely serious, in regard to the pref't Con-

ture. As many of the Members of that Assembly

inclined themselves, that on the Arrival of the Count

Albemarle, his most Christian Majesty would have

recourse to some Expedient, they are extremely angry

and disappointed; and the Loss of Menin has pro-

duced some of them to such a Degree, that they are

become as eager for War, as they were formerly

inclined to a Negotiation. What induc's us to think

the Republick will make the former her Choice, is the

instance of appointing a certain Number of Men

to protect their Herring Floty; for which

there could be no Occasion, if they did not foresee a

Danger, to which they are not exposed as Auxi-

liaries, nor indeed can be expo'd, any other Way,

by declaring War against France.

June 14. By a Deserter just now come into

us, we learn, that the French had not yet broken

Ground before Ypres. Letters from Paris mention, that Admiral Matchews has destroyed 11 Xebegs in Germont, three Leagues from Mantes; the Troops which were on board got ashore.

Dr. ROBERT EATON's

BALSAMICK STYPTICK,

Truly prepared and sold at the Doctor's late Dwelling House, now Mrs. DUTTON's, in Salisbury-Court, Fleet-street.

THIS Medicine restrains, in a most

surprising Manner, all internal as well as external Hemorrhages, i. e. it insensibly and quickly stops all dangerous bleedings at the Nose or Gums, spitting or vomiting Blood; also the Inmoderate Flux of the Hemorrhoids or Menses; bloody Urine or Stools, bleeding of large Wounds, &c. if used a cordage to the plain Directions given with it, as will appear by the Certificates of several Eminent Physicians, and in the large Account of this Medicine, written by the Doctor himself, and dedicated to the College of Physicians a little before his Death.

It keeps good, or many Years, at Sea or on Shore, in all Climates; therefore must be universally Useful.

The Doctor not only obtaining his Majesty's Letters Patent for the sole Vending of this most Excellent Medicine; but also a Clause in a late Act of Parliament, exempting this Medicine from the Inspection of the Censors or the College of Physicians, to which all other Medicines are liable.

N. B. The late Learned Dr. CHEYNE, in his Excellency, entitled The Natural Method of curing the Diseases of the Body, &c. prefers Eaton's STYPTICK to Helveticus's and other Stypticks; and speaks of it as follows: — 'Every one knows the agglutinating Quality of sweet Blood, and I apprehend it is to this, that Eaton's Styptick owes its soft, mild, soldering Efficacy. — It is more mild, substantial and soft, than the mildest Steel Preparations, and more fit to patch a Hole, or grieve up a Rupture, or to give a Balsam to the acrid and inflam'd flowing Blood of the Patient. He says, he is confirmed in this by a Physician of great Worth and Cander, who has great Opportunities of dealing in such Cases, by his Tractate in Midwifery. See p. 182.'
